 - A nationally recognised leader in health care quality and population health management, Dr Shulkin will use his proven expertise and experience in bringing innovative medical technologies to market
 - Named by industry publication *Modern Healthcare* as among the "One Hundred Most Influential People in American Healthcare"
-

Melbourne, Australia, 13 April 2023: Respiratory imaging technology company 4DMedical Limited (ASX:4DX, "4DMedical", or the "Company") today announces that Dr David Shulkin, MD, has taken an advisory role with 4DMedical.

As an accomplished and prominent health care system leader, physician, academic, and industry entrepreneur, Dr Shulkin brings a comprehensive understanding of integrated health care to 4DMedical, with particular knowledge of the Veterans Health Administration, the largest such system in the United States. Appointed as Under Secretary of Health in 2015 by President Obama, Dr Shulkin was subsequently appointed as Secretary of Veterans Affairs in 2017 as the only Cabinet Secretary to be unanimously confirmed by the Senate during the Trump Administration.

Significant and multi-faceted experience

A graduate of Yale School of Medicine and the University of Pittsburgh, Dr Shulkin's capabilities were recognised early through his appointment as Robert Wood Johnson Foundation Clinical Scholar at the University of Pennsylvania. He rose to become President and Chief Executive Officer of Beth Israel Medical Center in New York City, also holding peak executive management roles at Morristown Medical Center and Atlantic Health System Accountable Care Organization.

Dr David Shulkin, MD

As a clinician, he was the first Chief Medical Officer of the University of Pennsylvania Hospital, and fulfilled similar physician leadership roles at the University of Pennsylvania Health System, Temple University Hospital, and the Medical College of Pennsylvania Hospital.

His academic and research appointments include Chairman of Medicine and Vice Dean at Drexel University College of Medicine, and Professor of Medicine at Albert Einstein College of Medicine.

He was Editor of the peer-reviewed *Journal of Clinical Outcomes Management and Hospital Physician*, and was a member of the editorial board of the *Journal of the American Medical Association*.

Dr Shulkin's entrepreneurship and understanding of health care industry disruptors has a basis in his experience as founder, Chairman and CEO of DoctorQuality, Inc., a consumer-oriented source of information on quality and safety in health care.

Dr Shulkin was born on a U.S. Army base where his father was posted as an officer, and is the grandson of returned soldiers from World War I. As Secretary of Veterans Affairs, Dr Shulkin took decisive action in preventing deaths from suicide, and resisted political pressure to privatise VA clinical practices, earning the respect of the Veteran community.

Named by industry publication *Modern Healthcare* as one of the "50 Most Influential Physician Executives in the Country" and as among the "One Hundred Most Influential People in American Healthcare", the appointment of Dr Shulkin brings an unparalleled understanding of Veterans' health care to 4DMedical as it looks to deploy XV Technology® as part of the VA's implementation of PACT Act-enabled care for Veterans.

4DMedical MD/CEO and Founder Andreas Fouras said:

4DMedical is committed to supporting America's Veterans, providing them with greater certainty regarding their lung health by using XV Technology® to provide insights that no other available technology can deliver.

I could not be more excited to be partnered with Dr David Shulkin, who brings a distinguished record as a passionate and dedicated leader, working above and beyond to improve respiratory health of Veterans and the wider community.

About 4DMedical

4DMedical Limited (ASX:4DX) is a global medical technology company that has created a step change in the capacity to accurately and quickly understand the lung function of patients with respiratory diseases.

Through its flagship patented XV Technology®, 4DMedical enables physicians to understand regional airflow in the lungs and identify respiratory deficiencies earlier and with greater sensitivity as they breathe. This technology powers 4DMedical's FDA-cleared XV Lung Ventilation Analysis Software (XV LVAS®) - the first modality to dynamically quantify ventilation throughout the lungs, and its Computed Tomography-enabled counterpart software, CT LVAS™.

XV LVAS® and CT LVAS™ reports are prepared using 4DMedical's Software as a Service delivery model using existing hospital imaging equipment or the Company's revolutionary XV Scanner.
